PERSONAL PROFILE

Enthusiastic and professional frontend developer with 4 years' experience programming and designing websites for a wide range of clients and personal projects. Skilled at wireframing, low/high fidelity prototypes and delivering the product to a high-level standard. Excellent written and spoken communication skills capable of explaining complex web issues in easy to understand terms.

EDUCATION

BSc Computing (Software Engineering) University of Northampton, UK. - Sept 2018 - July 2021

RELEVANT EXPERIENCE

Total Engineering & Welding Website

Total Engineering & Welding, 2017

totalengineeringandwelding.uk

Solo freelance web design project for a start-up welding firm.

- Logo, business card and letterhead design
- Deployed to the cloud using Amazon S3, CloudFront, Route 53 and other AWS services
- Distilled client communication into actionable design requirements

MyNorthampton Redesign

Personal Project, 2018

github.com/jenewland1999/mynorthampton

Solo personal project redesigning student portal webpage.

- Mobile-first approach using CSS media queries and modern responsive units (EM, REM, FR)
- CSS Grid Layout with fall-backs for older browsers that do not yet support the standard
- Applied a more consistent design approach throughout

Barclaycard Challenge Event

19-20 Feb 2019

github.com/jenewland1999/barclaycard

Participated and won the team-based, software engineering challenge event organised by Barclaycard.

- Worked as part of a team of 2nd and 3rd year students to develop a solution for a real-world problem
- Exercised the Scrum methodology in order to work efficiently with structure
